

CELEBRATION TIME

OFFICIAL PRODUCT LAUNCH OF PA-10

It is with immense pleasure that we announce the launch of a new Gold Note product: the PA-10 Power Amplifier!

We are very happy to finally let everybody build a complete High-End audio system with our series 10 products. After the multi-awarded phono stage PH-10 and the most

advanced DAC DS-10, the power amplifier represents the missing link to immense musical pleasure. Just add a pair of speakers and press play!

The PA-10 is small but powerful stereo power amplifier capable of delivering a power rate of 75W per channel @ 8 Ohm that can be increased to a considerable 600W @ 4Ohm when used in mono (Bridge-Tied-Load).

Among its useful functions is also the possibility to adjust the damping factor for an ideal matching of the amplifier with your loudspeakers and the GN LINK technology that puts the PA-10 in Master-Slave-Mode with other units with the same feature.

From end of December 2019, DS-10 will be available worldwide through authorised Gold Note dealers at an launching price of 1.390€. Make sure to schedule an audition with your closest dealer!

TIME FOR GOLD

LUXURY PRODUCT FINISHES

It's Christmas time and as every year we are surrounded by sparkling decorations. The Gold Note turntables and loudspeakers with 24k gold foil and 975k silver foil finish perfectly fit into this picture and make an extra special gift of course. But December is not the only time of year when these golden beauties perform well in the homes of audio enthusiasts, we believe they look fantastic all year round!

OLD MEETS NEW

Following our philosophy of combining tradition and innovation, we transferred the seemingly old school gold foil from the sphere of antiques to modern audio technology. Now they adorn state-of-the-art turntables and speakers, giving the products a refined look that will easily attract attention in any luxury or classic style home. By choosing the 24k gold foil or 975k silver foil finish, a piece of Italy will be always present in your listening room and make your music sound even better – with literally golden notes!
